HUNTING FOR STOLEN JEWELS.

Detectives Trying to Earn the Reward

Offered by Matthew Morgan.

The gems were set in rings, bracelets, neck-

The difficulty in the case is the unlikelihood that an outside thief would know the location of the jewel-box or be able to go directly to the drawer in which it was kept.

LIFT THE ISSUE.

The next Presidential campaign ought to be fought upon principles, for a purpose. What do political parties seek power for Surely for something more important than

the possession of the offices. The Democratic party should go into this campaign committed by acts, as well as words, to tariff reform, to civil-service reform, to public land reform, to ringbreaking and monopoly-fighting.

With such a platform, and a record to show its sincerity, the party would be both right and irresistible. The advantage is

already largely on its side. Let the party seek power for the public good and it will deserve to win, and win.

GRAPPLING THE GIANT.

A vigorous effort will be begun to-day be fore the Interstate Commission at Washington to bring the Standard Oil monopoly to account. Twelve Southern railroads are moned to answer the charges of gross freight discriminations in its favor.

This investigation should lead to the overthrow of the unscrupulous oil monopoly. It has no legal existence. It maintains itself in a perversion and practical defiance of the laws regulating corporations.

The people must grapple sooner or later with the trust system. The Standard Oil Trust is the origin, head and front of the offending. The other trusts are merely imitating its bad example.

Why not push things in the courts and legislatures this winter, and settle forever the question of mastery between the trusts and the people?

"A GOOD READY."

All over the country, and especially in New England, the prudent housewives are getting " a good ready " for the Thanksgiving festival on Thursday.

But there is one preparation that is quite as important as the concocting of substantials and dainties for the feast. It is the forethought and generosity that will make somebody else thankful on the day of gratitude who might otherwise have scant prevision for joining in the general good cheer.

Let the "good ready" for Thanksgiving include a remembrance of the poor.

A COSTLY EXPERIMENT.

After interminable pother and bother it appears that the Subway Commission has constructed nearly ten miles of underground conduits at an outlay of \$2,000,000.

Yet this brilliant Commission has not determined whether the wire conduits should be insulated! This would seem to be the AB C of electrical subway science.

A large proportion of the conduits constructed are not insulated, and in the opinion of many experts their usefulness will be seriously impaired, if not destroyed, by this

At this late day the Commissioners are experimenting to learn what they should have ascertained at the outset. A little less personal squabbling in the Electrical Board and a little more horse sense in the methodlof procedure might prevent the re-ripping of the streets and insure the success of this muchneeded improvement.

THE CRISIS IN PRANCE.

With the Cabinet out and President GREYY refusing to follow its example, the situation in France grows critical.

The Government has a head, but no body. M. Grevr's cool assertion that he can make another Cabinet will at once be tested.

It would be a turn in the kaleidoscope for which even France can furnish no parallel If the new Cabinet formed for the recalcitrant President should ask for his own resignation. Meanwhile, the "man on horseback" is nowhere in sight.

A PERSISTENT OPTIMIST.

Senator Evants wears none but rose-colored glasses in looking upon political events. Defeat or success for the party is therefore "all the same" to him.

This persistent optimist admits that the Prohibition vote in New York is constantly growing and " will be larger next year than t was this." He concedes that a large part of the Labor vote " went back to the Demoerats." And yet he "does not hesitate to predict a Republican victory in this State in the pational contest."

What a comforting prophet Mr. Evants would have been to the contemporaries of

NOAM! To always have a strawberry-tinted FARMER-GIRL VS. SHOP-GIRI hue at one's command is a good part of the philosophy of life. If Mr. Evants shall be there, he will beam benignly upon the wreck of matter and the crash of worlds.

ANARCHIST LOGIC.

The sentence to six months in the Workhouse of Kornio, the Anarchist who armed himself in obedience to JOHANN MOST's advice and threatened to shoot a WORLD reporter, ought to be a lesson in logic to these fellows.

Howling for "freedom of speech" for themselves, they threaten to shoot other people for exercising it. Claiming, and in Chicago exercising, the right to kill officers of the law, they assume the rôle of martyrs when the law gives them a dose of their own society to enact any laws for its own protec- agents in different parts of Passaic and Bertion, they are the first to clamor for the safeguards of the statutes.

It is well occasionally for the engineer to be " hoist with his own petar."

AN OLD STORY.

The sinking of the Scholten is but the repetition of an old story.

The familiar features were all there: Running incautiously in a fog, a failure on one of the vessels to display proper lights, a crash in the dark, terror among passengers and no discipline for the crew, useless lifebosts, acts of heroism, marvellous escapes, a long death list.

Will it be the usual verdict of " nobody to blame ?"

THE TELEPHONE MONOPOLY.

A royalty of \$14 on each 90-cent instrument, Over 350,000 in use. That is what pays the big dividends on the Bell Telephone Company's \$100,000,000 of watered stock.

A patent tainted with fraud. A broad specification, almost unprecedented in the history of patents, maintained in the courts by an army of sharp-witted lawyers. That is the basis of the monopoly.

A block in the way of inventive progress Buying all improvements only to smother them. Crowding out all competition. That is its policy.

Is it strange that the American public would hail with delight the overthrow of this greedy monopoly?

PHENIX T. BARNUM.

BARNUM has received another call from his old acquaintance, the fire fiend. The conflagration that made Bridgeport a scene of terror last night is but a repetition of the disasters that have periodically overtaken the veteran showman.

But BARNUM heretofore has found himself a very enterprising Phoenix. That his wings still retain the vigor to rise triumphantly over the ashes is the unanimous hope of young America.

Simultaneously with the news of the fire comes the announcement that his agents are already planning for new structures.

Call him PHORNIX T. BARNUM.

The sewing-women in the cities are slaving for bread. The farmers' girls in the country sew for pin-money. It gives the girls a new gown or a bonnet, and enables the wife to get sown or a connect and chaoses the wife to get a new carpet for the parlor or a new piece of furniture. This business has grown to such proportions of late, that several companies who used to manufacture shirts in New York City have removed their factories to Paterson, where their goods are called for by the farmers when they are in the city to attend the market. Any market day a large number of farm wagons may be seen tied in front of these factories, with country people carrying into the factories bundles of finished work and

bringing out packages of new work.

When spoken to by The World reporter
many of the country women, who thoughtlessly heap burdens upon the weary backs of ity sewing girls, expressed regret and sym-onthy for their more unfortunate competitors, and spoke in such a manner as to warrant the belief that if the subject were properly exbelief that if the subject were properly ex-plained to them they would cease the com-petition which adds to the labor and hard-ships of those in whom they are naturally interested and whom they should rather ssist than compete against.

PHILADELPHIA, Nov. 21.—Mr. Powderly has received scores of telegrams to-day thanking him for issuing the following circular in behalf of the striking miners in the coal regions:

For the first time during my official career I fee For the first time during my official career I feel called upon to go before the order, and all lovers of fair play, whether in or out of the order, for the purpose of making a personal appeal in behalf of the starved and outraged coal miners of the Lenigh and middle coal-fields of Pennsylvania. The appeal sent out by the General Executive Board states the facts, but it gives only a faint coloring to the real state of affairs in the coal regions. We read of the heartrending scenes of eviction as practised in Ireland. We are told of the terrible work of the crowbar brigade, which levels homes, severs broken, loving hearts forever, driving kindred across the sea. None of these scenes can outrival the acts of cruelty that are practised every day in the scourged, misery clouded middle coal-fields of Pennsylvania.

Falling in that, they have continued a hopeless struggle to keep food in the mouths of loved ones while enduring every privation themselves. The last hope is gone, tired nature refuses to longer perform its functions, and in despair the miners have laid down their tools. They appeal to their fellow-citizens for the bread which their honest labor could not win. I unite my humble voice with theirs and ask relief for them. Give quickly, give liberally. HECLA MINE AFIRE AGAIN. Destruction Feared If the Flames Reach the Main Engine. [SPECIAL TO THE WORLD.]

MARQUETTE, Mich., Nov. 21.-Early vesterday morning fire was discovered at 17 level in No. 1 shaft, Hecla branch, of the Calumet and Hecla copper mine, a few hundred feet north of the shaft in which the fire of three months ago occurred. The shaft is a solid mass of timbers, and the fire was in full blast when discovered. Huge volumes of smoke were seen rolling up from the shaft-

The main engine shaft is only 100 feet north of the shaft in which the fire is, and if it reaches the main engine the destruction will cause, as the building has been unoccupied for several months. Senator Sherman only glances over the newspapers and does not believe in rading a book until it is a year or so old. If its popularity does not last longer than this he says it is not worth reading, and life is too short to read everything that is published. Senator Sherman has a very fine library, and it is not one of pure finance and politics by any means. He has the finer editions of the standard authors, and reads the French, though he does not speak it.

Justice Gray is another reader of French novels, and he devours them at the rate of from six to ten a week. He has drawn more than a thousand from the Congressional Library during the past five years, and by the way, the reading of these Supreme Judges is full of interest. They are all literary men and they all have fine libraries. Judge Stepnen J. Field is a man of broad culture. He has been a book collector all his life and he is very fond of travels and the classics. Justice Bradley has perhaps the largest private library in Washington, with the exception of that of Bancroft, and his library relates largely to the law, politics and history. As cond-hand book dealer tells me he is always looking out for rare law block, but that his collection is so great that he finds few things that are not now in it. Bradley is a man of hoobbles. He will take up a queer question in history and find out all about it. He has invented a number of curious calendars for telling the days of the week curious calendars for telling the days of the wee and month 200 years back and he is also fond o

Convenient Divorce Laws in Egypt.

Alexandria Correspondence of the Milwankes Sentinel.]

A wife may be divorced twice and return to her usband, but if he divorce her a third time, and with a triple divorce declared, and send her away be cannot live with her again until she has been one month married to another man. After the third divorce the husband must pay the part of the dower which was set aside for the wife before marriage, and he must support her out of his house during the three months in which she may not marry again. If the wife be separated from the man, and not divorced, she receives a weekly allowance from him. A divorced woman may, after divorce, retain her son, under two years of age, and custom gives the child to the mother till it is seven years old; then the father must claim the son. When a man forfeits an engagement to marry, he must bay the woman half her dower, and she is free to marry at once, when a wife is disobedient, the husband may beat her; if she persist in disobedience, he may take her with two witnesses, not his relations, to the court, and declare against her, and if she does not promise to be obedient thereafter, is not obliged to read, lodge or clothe her, but need not divorce her; and if he suspects that she desires to be divorced in order to remarry, he surely will not. If she confesses her wrong, and promise obedience, he must at once divorce her or take her borne. If a wife be cannot live with her again until she has been order to remarry, he surely will not. If she conlesses her wrong, and promise obedience, he must
at once divorce her or take her home. If a wife
does not wish to live with her husband, she enters
a complaint against him at the court, stating that
her family will support her, and makes a demand
for separation. If the women of the same harem,
or of different ones, quarrel and are complained of
to the court, their husbands are punished by the
court; but we may be sure that their vicarious
correction does not save the poor women from
chastisement. The husband divorces the wife, but
the wife cannot divorce the husband.

Her Knowledge of Boxing Saved Her.

There is a club of thirteen young women of the North Side who have a neat gymnasium fitted up and several of the members have become proficient with the gloves. One of the fair pugilists is a remarkably clever boxer and a hard and sharp hitter. Her knowledge of the art of self-defense was of Her knowledge of the art of self-derense was of great advantage to her in a little adventure that happened the other night. She was returning alone from La Salle avenue, where she had been calling on a friend, at 11 o'clock. On approaching the corner of Clark street she was accosted by a strange man whose appearance proclaimed alim to be a 'rough.'' The young woman only walked on the faster for this, but was obliged to confess afterwards she grew nervous. As she crossed Clark street she observed that the viliain was following her. After having passed Clark street, in the comparative darkness of a cross street, the viliain hurried forward and accosted her again, at the same time laying his hand on her shoulder. He got a response this time. Quick as a Zasn she turned, shot time laying his hand on her snouncer.

This staggered him, and before he could recover she had swung her right upon his car and he dropped into the gutter. Then the brave and ovely boxer gave a shrick and rain home, nerveiess and pale as a ghost, and arrived there in a state of collapse. It was days before she recovered from her fright. But she still keeps up her boxing.

Perfumed Chest Protectors for Dudes. [From a Society Journal.]
It is going to be simply delightful for a girl to plant her chin on the diamond stud of the society man in the mazes of the dance this winter. Alphonses's chest has developed since he disported in the water at Newport last summer. One of the girls mentioned it to him. He turned it off by say-ing that he had been rowing with the boys a good deal lately, and nothing threw out a man's chest like that—except the landlady of a salior's board-ing-house. He did not disclose that the boys who was dress suits the winter have all bought heard. wear dress suits this winter have all bought wear dress suits this winter have all bought beautiful little chest protectors of pale bine allk, staffed with cotton and steeped in sachet powder. They give a noble frontage to the rather flat young man of the period. At all events it is a custom bonored in the observance now, and it will make the ball rooms pleasant if all the young men wear sachet powder-stuffed pads with dress suits this winter.

Gen. Sherman a Model First-Nighter.

[From Clara Belle's Letter.]
Is is delightful to see Gen. Snerman at first nights theatres. He always has a pretty woman wit him, and the constant attention he pays to her is a him, and the constant attention he pays to her is a lesson to those careless young men who go out and dawdle in the lobby or hold up some neighboring bar during the intermissions. The old war-horse is white-headed and stubbly bearded. His clothes are not the correct evening dress by any means, for he usually wears a pepper and sait suit, but there is a world of earnest admiration in his houses to bue eyes and the court he pays to his companion is more than a claw-hammer coat could convey.

GREVY STOICAL AND FIRM.

THE CABINET IS DOWN AND WONDERING HOW TO GET HIM OUT.

All Paris is Undecided How the Wretched Muddle Will End-How Grevy Received the News that the Cabinet Had Collapsed -Clemenceau Makes the Greatest Effort

of His Life-The Latest Rumor.

PRPECIAL CARLE TO THE WORLD. Paris, Nov. 21.-Never, even at the Palais Bourbon, were anticipations so completely falsified as they were yesterday. I happened to meet on the preceding evening almost all the members of the Government and several prominent leaders of the Opposition parties, and everybody, without exception, was convinced that the interpellation would be adjourned by general consent till Thursday, Rouvier's position, however, had become unenable, nor will the Ministry be able to hold tits own in the Chamber so long as Grevy remains at the Elysce palace. The difficulty is

how to get him out. · The case has not been provided for in the machinery of the constitution. The Presi. dent of the Republic can, it is true, be arraigned for high treason by the Senate and Chamber of Deputies in Congress assembled. but Grevy is not accused, nor can be be, of a crime against the State. It is in his power to nominate a Ministere d'Affaires for carrying on the business of the country, and none of his Ministers need necessarily be members of either house of legislature, but the Chamber of Deputies would, of course, have the last word in granting or refusing supplies. The The members would probably adopt the middle course of voting only douziemes provisioires-that is to say, the supplies needed from month to month. M. Grevy is still at the Elysee, but the Cabinet is down.

HOW WILL IT ALL END? A Ministerial crisis has been added to the

Presidential difficulty, which was already serious enough, and every one is wondering how it will all end and what the situation will be when the week that has just opened has fully run out. No one had any notion of what was about to occur, except, perhaps, some of the members of the Right, who may have altered their policy at the last moment, Clemenceau had insisted on interpellating the Government on the political situation, but so diffident was he of victory that when chatting with M. Rouvier, M. Floquet, M. Reinach and some other notabilities during the first performance of "La Souris," on Friday evening, he remarked, in answer to the late Premier's exclamation, that he would be only too glad to fall over the question of the date of the interpellation, but that he would have no such luck, as the Radicals were sure to be beaten.

The eventful sitting, though very short, was fertile in incidents. M. Rouvier opposed immediate interpellation on the ground that it would be advisable to wait until the conversion of the four and a half per cents. had been fully carried out. The operation would be concluded on Wednesday, and on the following day he would be at M. Clemenceau's service. M. Rouvier added significantly that of a majority was wanted to get rid of the Ministry it could attain its object without indulging in very long discussion. It could show its sentiments by the choice of a day for interpellation, but the Government could not accept an earlier date than Thursday. The vote, therefore, assumed the proportions of a vote of confidence in the Cabinet.

M. Clemenceau at once perceived his advantage. He made, perhaps, the best speech of his life, and concluded by saying that, as a matter of fact, there was no Government, the present one being tainted at its very source, the Elysee.

A reactionary Deputy made a humorous speech and Baudry d'Asson made some grotesque remarks about republics in general and that of France in particular.

Rouvier and his colleagues lost no time. They held a short consultation, wrote out their resignations and soon afterward the ex-Premier was at the Elysee. M. Grevy had dready been apprised by telephone of the fall of the Cabinet, but he bore the bad news like a stoic, calmly remarking that he could form another. The logical solution, as on the downfall of the Goblet Cabinet, would be to send for Clemenceau, but if the Radical leader were invited to form a Ministry, the first thing he would ask of M. Grevy would

be his instant resignation. Grevy is more determined than ever to stand to his guns. He professes to believe that Wilson's innocence will be demonstrated conclusively, and his sonin-law on his side will hold his head high. Yet, those who contributed to yesterday's overthrow of the Cabinet did so under the firm conviction that a Ministerial crisis must eventually force the President to retire. M. Grevy's first thought was of his old crony, M. de Freycinet. The little white mouse would not desert him in his trouble. Then if M. De Freveinet proved recalcitrant he could send for M. Goblet, and if he, too, failed him, as he probably would, he could

find some other Premier. I hear that M. De Freycinet's friends are opposed strongly to his resuming the reins of office at this juncture, and he is not the man to risk his future even for les beaux yeux

of his old ally. THE LATEST RUMOB.

Late this afternoon rumor was current in the chamber that M. Grevy had determined on consulting en bloc the Presidents of the Senate and Chamber; M. Clemenceau, M. Rouvier, M. de Freycinet, M. Jules Ferry, M. Henri Brisson, Mr Duclere and others as to whether he ought or ought not to retain his post, it was added that if it was decided that Grevy could remain at the Elysee the President would appoint a statesman selected by his advisers to form a new Cabinet. If Grevy were to take such a step as that with which the report credited him this afternoon, it would indicate that he was

at length alive to the gravity of his position. I hear, however, that there was no foundation for the rumor that the President persists in his determination to remain at the Elysco and that this evening M. Goblet was sent for to confer with him.
